Temperature Measurement Devices

Bimetal Thermometers and Thermowells

- Accurate to ±1% of full scale in accordance with ASME B40.200
- Easy-to-read dial sizes with single and dual scales
- Dampened movement for protection against vibration
- Stainless steel construction
Dampened-Movement Bimetal Thermometers

Swagelok® thermometers are actuated by a bimetal helix coil. Silicone-free gel dampens vibration effects, and cases are hermetically sealed in accordance with ASME B40.200 to prevent fogging and moisture damage to internal components.

Features

- Acrylic, glass, polycarbonate, and safety-glass lenses to meet application requirements
- All-welded 304 stainless steel construction standard; 316 stainless steel process connection and stem available
- Adjustable-angle, center-back, and lower-back mount process connections
- External adjustment for field calibration
- 50 % over- and under-range protection against damage to internal components up to 500°F (260°C)
- Anti-parallax dial for easy reading

Technical Data

Dial

- Temperature measurement ranges:
  - –100 to 150° through 200 to 1000°F
  - –70 to 70°C through 100 to 540°C.

Case

- Stem angle adjusts more than 180°; case rotates 360°.
- Maximum ambient operating temperature 200°F (93°C)

MS-02-353, RevE, December 2018
Introduction
Since 1947, Swagelok has designed, developed, and manufactured high-quality, general-purpose and specialty fluid system products to meet the evolving needs of global industries. Our focus is on understanding our customers’ needs, finding timely solutions, and adding value with our products and services.

We are pleased to provide this global edition of the book-bound Swagelok Product Catalog, which compiles more than 100 separate product catalogs, technical bulletins, and reference documents into one convenient, easy-to-use volume. Each product catalog is up to date at the time of printing, with its revision number shown on the last page the individual catalog; for example, the Swagelok Gaugeable Tube Fittings and Tube Adapters catalog is MS-01-140, RevW. Subsequent revisions will supersede the printed version and will be posted on the Swagelok website and in the Swagelok electronic Desktop Technical Reference (eDTR) tool.

For more information, visit your Swagelok website or contact your authorized Swagelok sales and service representative.

Safe Product Selection
When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

Caution: Do not mix or interchange parts with those of other manufacturers.

Warranty Information
Swagelok products are backed by The Swagelok Limited Lifetime Warranty. For a copy, visit swagelok.com or contact your authorized Swagelok representative.
