

# Swagelok Metric Tube Fittings

Note: These *metric* fittings are to be used on metric tubing sizes only. They are similar in appearance to Swagelok tube fittings in fractional sizes. The significant difference, however, is in the internal diameter of the tube fitting components. Due to the external similarity between metric and fractional sizes, a stepped shoulder is machined into the body and nut hex for easy identification. Shaped fittings are stamped MM.

## Sizes Available

Swagelok Metric tube fittings are available in 2, 3, 4, 6, 8, 10, 12, 14, 15, 16, 18, 20, 22, 25, 28, 30, 32, and 38 millimeter tube sizes.

For information on other sizes, consult your Swagelok representative.

To convert fractional or metric tube systems to BSP, DIN, JIS, or ISO systems, see *Swagelok Gageable Tube Fittings and Adapter Fittings, MS-01-140*, in your Swagelok Product Binder.
