To deburr OD of tubing: Place deburring tool over the end of the tubing with the blades on the outside. Rotate the tool in a clockwise direction.

To deburr ID of tubing: Place deburring tool over the end of the tubing with the blades on the inside. Rotate the tool in a clockwise direction.

All: Wipe deburred end of tubing clean with a cloth. The deburred tube end should have a uniform edge break with no burrs. Internal and external chamfers should not exceed half the wall thickness of the tubing.

Deburring the ID of tubing
