TITLE

Nitrogen Gas Seal Test with Repeated Reassembly of 316 Stainless Steel Swagelok[®] Tube Fittings with Thin-Wall Stainless Steel Tubing

PRODUCT TESTED

The following bar stock and forged body Swagelok tube fittings were tested with 316 stainless steel seamless tubing.

Ordering Number	Part Form	Tubing Size	Tubing Hardness HRB
	Fractio	onal, in.	
SS-400-1-4	Bar stock	4/4 0.000	77 to 94
SS-400-9	Forging	1/4 X 0.020	77 10 04
SS-500-1-4	Bar stock	5/16 × 0.035	84
SS-500-9	Forging		
SS-600-1-4	Bar stock	3/8 × 0.035	88
SS-600-9	Forging		
SS-810-1-4	Bar stock	1/2 0 0.40	76
SS-810-9	Forging	1/2 × 0.049	76
Metric, mm			
SS-6M0-1-4	Bar stock	6 × 0.8	79
SS-6M0-9	Forging		
SS-10M0-1-4	Bar stock	10 × 1.0	82
SS-10M0-9	Forging		
SS-12M0-1-4	Bar stock	12 × 1.0	02
SS-12M0-9	Forging		00

PURPOSE

These assemblies were tested to observe the performance of stainless steel Swagelok tube fittings with advanced geometry back ferrules with thin-wall stainless steel tubing during a gas seal test with repeated reassembly under laboratory conditions.

TEST CONDITIONS

Original test date: December 2001

Tube preparation:

Tubing samples were cut to length using a tube cutter for 1/2 in. diameter and under.

Fitting assembly:

The test fittings and tubing were initially assembled 1 1/4 turns past finger-tight per Swagelok tube fitting installation instructions.

TEST METHOD

- 1. The assemblies were attached to a positive pressure gas test stand, submerged in water, pressurized to working pressure with nitrogen gas for at least 10 minutes and monitored for leakage.
- 2. Pressure was dropped, and the fittings were reassembled according to the proper Swagelok reassembly specifications.
- 3. The fittings were leak tested using nitrogen gas at the working pressure for at least 10 minutes at every fifth reassembly.
- 4. A total of 25 reassemblies were conducted on each test end.

TEST RESULTS

Fractional

Size in.	Samples Tested	Working Pressure psig (bar)	Results
1/4 × 0.028	16	4000 (275)	Pass
5/16 × 0.035	16	4000 (275)	Pass
3/8 × 0.035	16	3300 (227)	Pass
1/2 × 0.049	16	3700 (254)	Pass [®]

Metric

Size mm	Samples Tested	Working Pressure bar (psig)	Results
6 × 0.8	8	310 (4499)	Pass
10 × 1.0	16	240 (3483)	Pass [®]
12 × 1.0	8	200 (2912)	Pass

① One ½ in. sample experienced an estimated 0.05 std cm³/min leak rate at the 15th reassembly, and one 10 mm sample experienced an estimated 0.1 std cm³/min leak rate at the 10th reassembly, both due to improper re-tightening of the nut. After an additional tightening, the samples were re-tested with no detectable leakage.

No detectable leakage (except as indicated) was observed on any of the products tested during initial testing and after the 5th, 10th, 15th, 20th, and 25th reassemblies.

These tests were performed to consider a specific set of conditions and should not be considered valid outside those conditions. Swagelok Company makes no representation or warranties regarding these selected conditions or the results attained. Laboratory tests cannot duplicate the variety of actual operating conditions. Test results are not offered as statistically significant. See the product catalog for technical data.

SAFE PRODUCT SELECTION

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.
